RESEARCH TECHNOLOGY SOLUTIONS

FUB

Fondazione Ugo Bordonì
Research and Innovation

La Fondazione Ugo Bordonì

Fondazione Ugo Bordonì is a higher education and research institution, under the supervision of the Ministry of Economic Development, as defined by Law 3/2003.

Established in 1952 within the Ministry of Posts and Telecommunications, Fondazione Bordonì has a long-standing tradition of research and applications in telecommunications sector. Through fruitful exchange between basic and applied research FUB has been able to police technological landscape developments well in advance, combining studies in the field of ICT with the design and implementation of innovative services for government bodies, and with the identification of countrywide system policies in the field.

The Law 69/2009 guarantees its impartiality as trusted third party, and recognises its scientific autonomy, thus eligible to consulting and support of Government bodies and Independent Authorities, to elaborate and to propose development strategies for communications sector.

Mission

FUB produces innovative projects to the interest of the Government, of Government Bodies, of scientific community, and of citizens.

In particular, Fondazione Bordonì pursues the following objectives:

- Promote technological innovation for the development and modernisation of the Country;
- Transfer know-how for the digitisation of public administrations
- Supply scientific and technical support to institutions and enterprises;
- Cultivate innovation research at an international level;
- Foresee scenarios and supply tools for the protection of citizenship;
- Serve as a reference point to administrations, academia and industry.

In house company of Government Authorities

The 2019 Statute establishes the "Government Authorities Committee", which guarantees to all Government Bodies taking part in it to exercise similar control over the FUB pursuant to Art. 5 of d.lgs. 50/2016, thus allowing procurement to FUB through in-house providing.

As in house company bridging across all Public and Government Bodies, Fondazione Bordonì represents a unique situation in Italian ICT landscape.

FUB

Governance

FUB has a public governance - Members of the Board are appointed: by the Prime Minister's Office (Chairman); by the Ministry of Economic Development; and on indication of AGCOM.

To better pursue its mission, a new organisation has been defined in 2018, with an along redefinition of internal processes.

The new organisation is characterised with a first level management made of four Directions cooperating to meet strategic objectives.

VALERIO ZINGARELLI

TELECOMMUNICATIONS STUDIES AND CONSULTING - ADVISOR SINDACO DI VENEZIA PER LE SMART CITIES

SKILLS

The almost 140 employed of Fondazione Bordonì are engaged in project activities in 4 competence areas:

DATA ANALYSIS

Information retrieval, data mining, big data, Artificial Intelligence, Scenario and economic analyses.

CYBER SECURITY

Information and network security, blockchain, security evaluation and certification.

DIGITAL SERVICES

Process analysis, conception and implementation of digital services.

TELECOMMUNICATIONS

Design, implementation and management of fixed, mobile and broadcast telecommunication networks.

VISION

Technologies such as 5G, Blockchain and Artificial Intelligence (AI) are leading innovation in the ICTs, beginning to produce effects in all economic sectors, as well as in citizens' everyday life.

In the near future the combination of these technologies will boost a revolution, taking us further towards the next "quantum leap" in ICTs.

This may happen as a consequence of the intersection of phenomena and conditions already foreseeable in the actual global ICT scenario, such as:

- Explosion of **5G** connectivity and of the **Internet of Things**;
- Permanent success of **Artificial Intelligence**;
- Minute diffusion of **Blockchain** technologies to support digital services.

In this way entire productive subsystems will be completely reconfigured, both regarding business models as well as activity perimeter.

**TECHNOLOGICAL INNOVATION
FOR DEVELOPMENT
AND MODERNIZATION OF THE COUNTRY**
